

Therapies and Services

CORE's licensed professional staff is available to provide a variety of traditional and innovative, medically-sound therapies to best fit the needs of each resident.

- ⊗ Physical Therapy
- ⊗ Occupational Therapy
- ⊗ Animal Assisted Therapy
- ⊗ Therapeutic Recreation
- ⊗ Gatekeeping
- ⊗ Music Therapy
- ⊗ Psychiatry and Neurology
- ⊗ Psychology and Neuropsychology
- ⊗ Speech Language Therapy
- ⊗ Cognitive Therapy
- ⊗ Vocational Support
- ⊗ Residential Support
- ⊗ Art Therapy
- ⊗ Vision Therapy

Because each individual requires custom care, CORE also offers the following services:

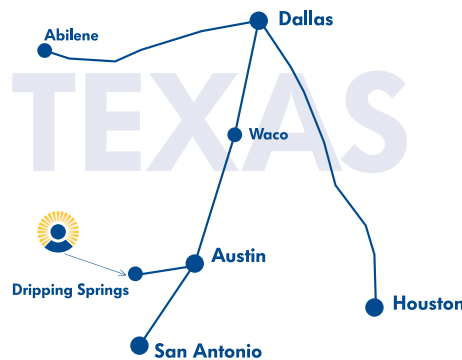

- ⊗ Vision Evaluation
- ⊗ Massage Therapy
- ⊗ Yoga
- ⊗ Driving Evaluation & Therapy
- ⊗ Vocational Evaluation & Services
- ⊗ Nutritional Consultations & Supplement Ordering
- ⊗ Spirituality Assessments & Guidance
- ⊗ Personal Weight Loss Programs
- ⊗ Community Health Club Membership
- ⊗ Travel Arrangement & Escort Services
- ⊗ Guardianship & Estate Planning Consultations
- ⊗ Religious Services
- ⊗ Biofeedback
- ⊗ Acupuncture

Direct care personnel help to further the gains of formal therapy by fostering a challenging and therapeutic environment. Direct care staff provide daily input to the treatment team, monitor treatment programs, provide structure and supervision for residents to practice new skills, and support individuals in transitional programs.

By coupling individualized treatment plans with a full spectrum of therapeutic and quality of life services, you will find some of the best opportunities for the people we serve.

CORE Health Care – Cedar Point
Long-Term Care for Complex Psychiatric Disorders,
Autism and Other Special Needs

CORE Health Care provides long-term care and support for people with a variety of special needs. Located in Dripping Springs, Texas, our home-like setting and professional staff are ideal for complex psychiatric disorders, autism and other special needs. We offer a **continuum of care** with a natural emphasis on maximizing an **individual's independence**. The programs are small by design because quality healthcare cannot be mass produced if each individual's life goals are to be encouraged and brought forth. Regardless the severity of condition, CORE believes each person deserves the best options, treatments and facilities in the industry. Each day residents and staff alike are genuinely excited to further their skills and reach their goals. With our residents' one-of-a-kind challenges continually changing, our programs center on compassion, understanding and trust.

We have witnessed the stress and anxiety families experience when their loved one is diagnosed with a prolonged, difficult-to-treat and complex disorder. We offer **multi-leveled solutions** to complex problems, making CORE a guiding light for families and individuals from across the nation, during these unpredictable and unsettling times.

The desire of everyone at CORE is to maximize each person's quality of life by developing leisure, social and vocational pursuits that the individual finds meaningful and consistent with personal life goals. For some, this includes restoring independence so that they can live in a less restrictive environment with minimal need for support services.

Cedar Point

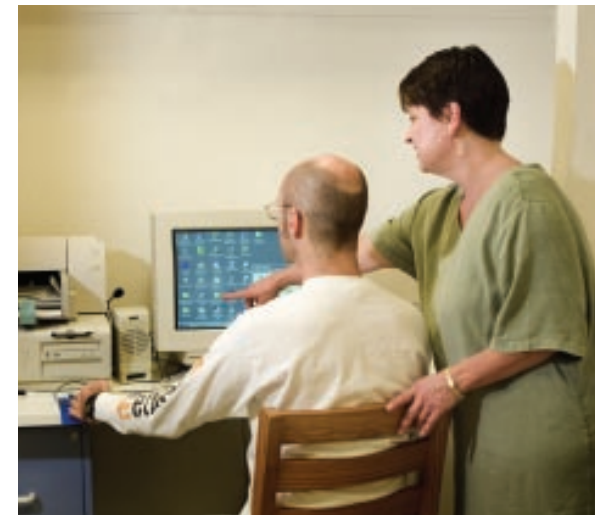

For over twenty-five years CORE Health Care has offered different programs to meet the current and potentially changing needs of our clients who have complex psychiatric disorders, autism or other special needs. Those who are unable to live independently, can benefit from the therapeutic services of CORE's Cedar Point program. A typical resident in this program has experienced numerous hospitalizations. Common diagnoses cared for at Cedar Point include:

- ⦿ Autism Spectrum Disorders
- ⦿ Bipolar Disorder
- ⦿ Developmental Disabilities
- ⦿ Intellectual Disabilities
- ⦿ Schizophrenia
- ⦿ Tuberous Sclerosis

CORE Philosophy

At CORE, we embrace the concept of neuroplasticity as our guiding philosophy for rehabilitation and long term care. In the context of an intense, comprehensive program, repeated learning trials are presented that can actually rebuild connections that were damaged by the injury or illness. These new discoveries provide reason for hope and optimism in the long rehabilitation process as well as motivation for the individual to persist with the hard work necessary to improve. The principles of rehabilitation also tell us that we can strive for and expect change at any time in a person's life. There is no time during a person's life that their brain is immutable. This knowledge opens up a world of opportunities for long-term survivors of brain injury, developmental disorders, and psychiatric illness. "The brain is always changing," and it is becoming increasingly evident that we can affect the direction and utility of that change. CORE is committed to staying on the cutting edge of new research discoveries to provide our clients with the most effective treatments based on the best available scientific evidence.

Mission

To work each day with the highest ethical principles in a quest to further develop the skills of our residents and team.

Vision

To become a world-class health care provider.

Values

Our commitment to these values and principles provides the framework for the manner in which we provide service. CORE Health Care is committed to:

- ⦿ Transparency of purpose and method
- ⦿ The best methods of treatment, both evidence-based and practical
- ⦿ Efficient management, with the safety and needs of consumers taking precedence
- ⦿ Significant value versus cost of services
- ⦿ Life-long relationships with residents and families, extending beyond facility walls
- ⦿ Building a common good through alliances with other forward-looking organizations

Licensed professional staff is able to provide psychological testing and therapy that can help prevent severe episodes and costly re-hospitalization
